Interact with Console

You have the ability to interact with the Console in reality. You may use the console to destroy any item present in reality. To do this, make a count to 50 of "I destroy ;insert item name; 1" "I destroy ;insert item name; 2" etc. to a count of 50. This is an interruptable action. If you are interrupted, or stop for any reason, you must start your count over again.

Make dream controller

You can jury-rig the existing technology to create a device that can get you out of the simulation. You require the gem within the wedding ring as a focusing device. If you put the **completed mental amplifier**, the **completed head-mounted display**, and the **wedding ring** on a table, and spend five minutes using this ability, you can create the dream controller. When you do, destroy all three items and see a GM.

Pick Pocket

You can pick pockets. You have a sheet of **stickers**. If you can place a sticker undetected on the person you want to steal from, find a GM. You can steal one random item or attempt to steal one specific item. For a specific item, give the GM a description of the item you want to steal and the GM will determine if your grab is successful and if it is, take the item from your victim and give it to you. If they do not have that item, you get nothing. For a random item, tell the GM you want to steal a random item and the GM will take one item from your victim and give it to you. You may also use this ability to place an item in someone's pocket. In this case, give the item you want to place to a GM. If you are caught trying to place the sticker, you must tell your victim that they caught you attempting to pickpocket them. **NOTE:** you may not pickpocket Bulky items
